Activation

7. Press the "Start Using" button on the activation which was sent to your email address and open the app.

8. In case the activation is not successful, get support from customerservice@fukintuned.com.

Bluetooth Connection

9. Touch to Start

10. Find and select Fukin Tuned that comes up in the Bluetooth scan.

Login To The App

11. Enter the 7-digit serial number located on the side of the device or on the side of the box.
12. Name your device and press the 'Connect' button.

Modes

Fukin Slöw: Touch the Fukin Slöw Mode and choose 'Change'. This mode intentionally reduces the throttle response. It can be used in challenging weather and land conditions.

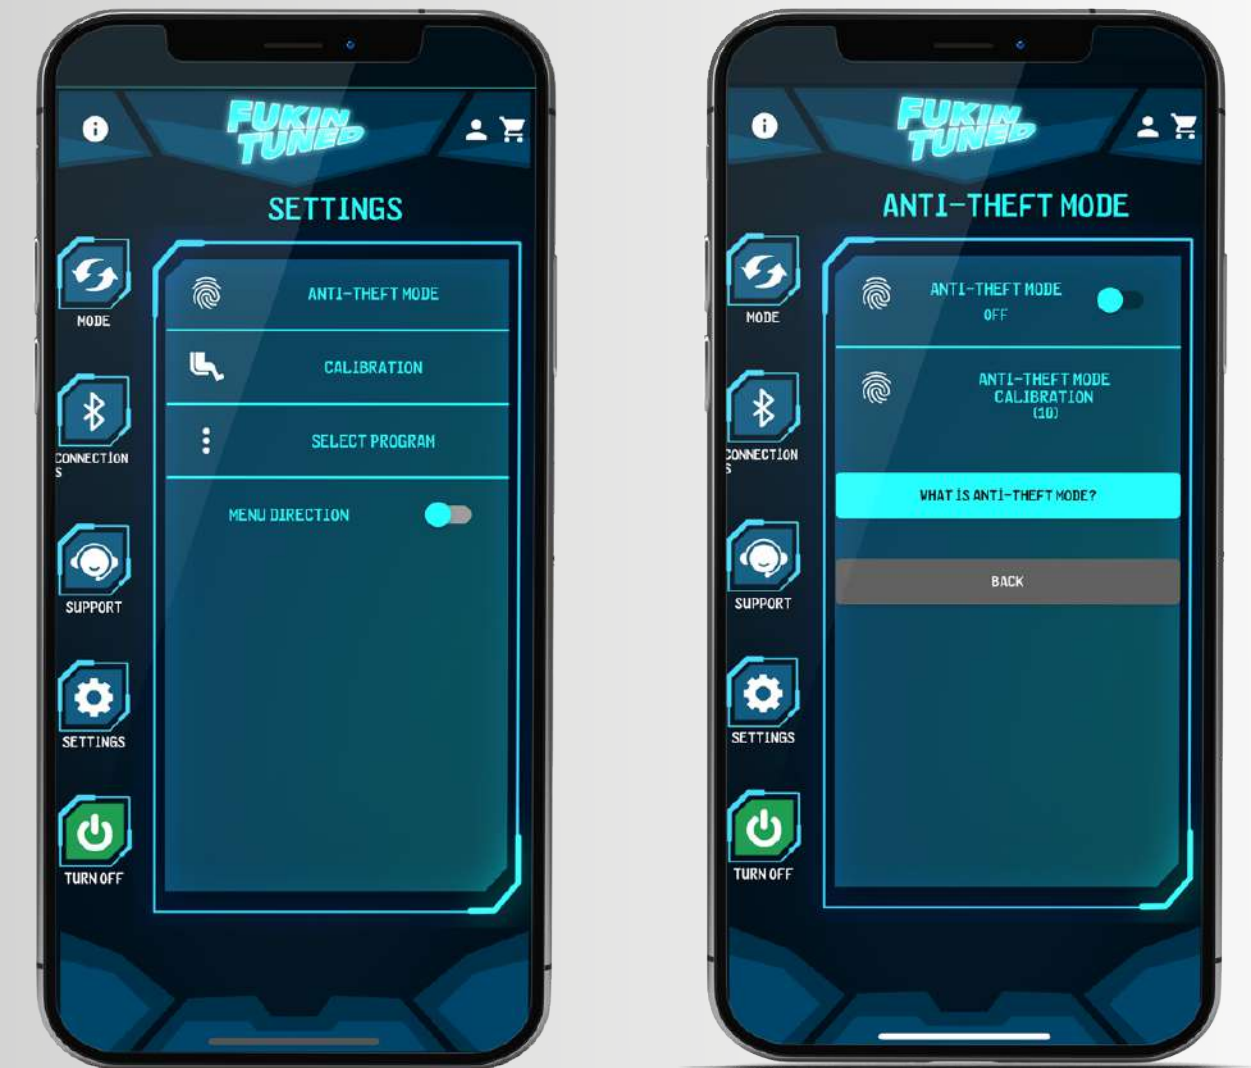

Fukin Cruise: It makes responses faster in the urban area.

Fukin Fast: Its responses are stronger than Fukin Cruise's, but still suitable for urban use.

Send It: It is the fastest driving mode which is also known as race or long distance mode.

Each mode can be adjusted to 9 different levels.

Anti-Theft Mode

13. Go to settings and press the Anti-Theft Mode.

14. Do the calibration.

-Calibration mode is only done once when you enable Anti-Theft Mode, and you won't need to do it again.

Remote Software Uptade

Essential: It is the program defined by a Fukin Tuned personnel according to your request.

You cannot change the mode without this update.

Standard: It is the program defined by a Fukin Tuned personnel according to your request.

You can install this update at any time.

If you want your Fukin Tuned to change throttle responses, (The process of accelerating or reducing the response), You can request remote software by contacting the technical department.

When you connect to the device from the application, an "Essential Update Available" warning will appear

Press the "Update" button to install the software.
